

## Remedy for removal of skunk smell from your Dog

I've tried many different solutions to remove skunk odor one of them was tomato juice that didn't work at all just made a big mess, I've also tried commercial skunk removal, no luck. I did try one that worked called "Nature's Miracle Skunk Odor Remover" but not as well as the homemade one. This one you must remember not to put in or near the eyes, nose or ears.

### Apple Cider Vinegar Variation

- ✓ Mix together 1 qt. hydrogen peroxide, ¼ cup baking soda, 2 tsp. Dawn Original dish detergent, 1 qt. apple cider vinegar, it ask for ½ cup OxyClean I used 1/3 cup and 1 qt of warm water.
- ✓ Mix in a bucket and sponge it onto your dog's fur, avoid those areas I mentioned above.
- ✓ Leave the mixture in for 5 to 10 minutes. My Boxer has very bad allergic reactions to many different elements so I left it on for 6 minutes. Rinse, Rinse, Rinse.
- ✓ After I bathe them with Johnson and Johnson Oatmeal Wash called "Johnson's baby moisture wash vanilla oatmeal". This works great on my Boxer and he smells so nice.

OxyClean may bleach dark fur. Just be aware.

Always keep a supply of the ingredients listed above. I haven't tried it without OxyClean but if you don't have OxyClean handy try without and see if that works. Let me know if that works just as well or not.
